Microsoft has hurt us all and held computers back 20 years:

1. No more tying agreements, one price for all customers, all welcome.
2. Uniform free nondiscriminatory developer support, e.g. mirrorable website only.
3. Unedited, unabridged W3x and W9x source code open sourced.
4. \$30,000,000,000 fine.
5. All disk and network structures 100% documented.
